

Newman Laboratory for Biomechanics and Human Rehabilitation

Seeking Really Good Squash Players for CLINICAL RESEARCH at MIT

Title: Wrist Stiffness and Hand Dominance: a study of squash players

Department: Eric P. and Evelyn E. <u>Newman Laboratory</u> for Biomechanics and Human Rehabilitation at the Massachusetts Institute of Technology (MIT)

Eligibility: We are seeking 10 healthy males (no prior wrist surgery) with 5 years or more of experience playing squash. Must be aged 18 or older and English speaking.

Descriptor: This study will evaluate the stiffness of the wrist joint using a robotic device and compare the results from your hitting arm with your non-hitting arm.

The session would be conducted at the MIT campus at 77 Massachusetts Avenue and take 1 hour to complete.

Interested in contributing to science?
Curious about visiting MIT?
Intrigued about rehabilitation robotics?
We need YOUR help!

Principal MIT Investigator: Professor Hermano Igo Krebs, Research Assistant: Taya Hamilton Participants will be recruited under study number: 1203004976
